Innovative Database and Information Systems Research Laboratory

Chengkai Li, Associate Professor and Associate Chair

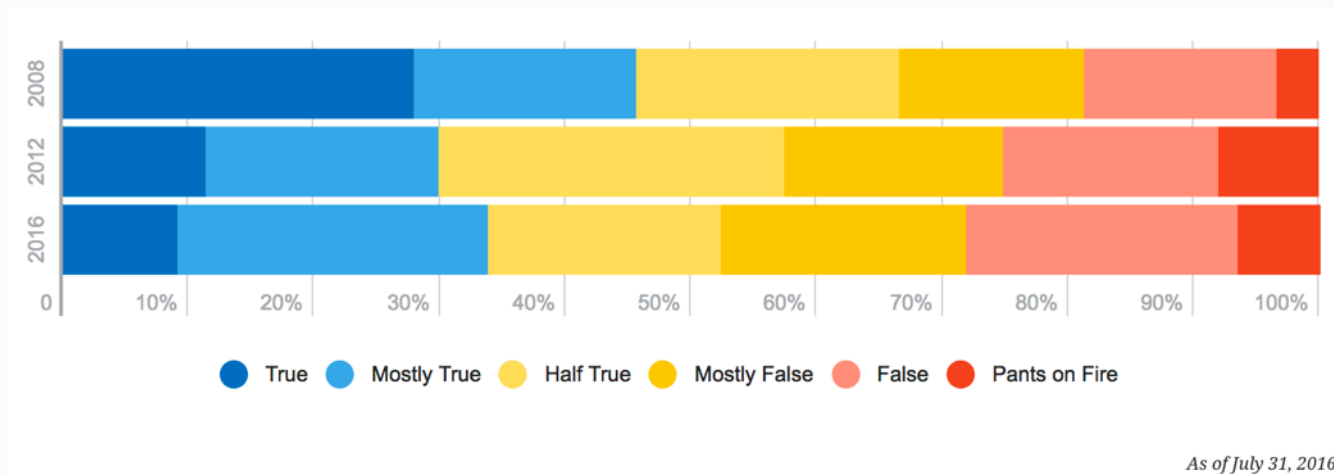

Research areas

- Big Data Intelligence and Data Science (Database, Data Mining, Natural Language Processing)

Research directions

- computational journalism, computational fact-checking
- crowdsourcing and human computation
- cybersecurity, social bots
- data exploration by ranking/skyline/preference queries
- graph database usability, knowledge graphs

Politicians Make False and Misleading Claims

Fact-checks on major party presidential nominees.

Source: PolitiFact.com

National Security Threats

- Fake-news floods social media (“filter bubbles” and “echo chambers”).
- Facebook trending topic algorithms promoted fake-news.
- A sample of 140,000 Twitter users in the battleground state of Michigan shared as many junk news items as professional news during the final ten days of the 2016 election.
<http://politicalbots.org/?p=1064>
- Russian government interfered with the 2016 election. Fake-news websites and bots used.
- Pizzagate: conspiracy theory led to shooting

Combating Falsehoods

- 100+ active fact-checking sites in 2017 (PolitiFact.com, FullFact.org, CNN, Washington Post, New York Times, ...)
- Google and Bing include fact-checks in search results.
- Facebook lets users report false items and flags items disputed by fact-checkers.

Fact-checking is Hard

“... our Navy is smaller than it's been since 1917”, said Republican candidate Mitt Romney in third presidential debate in 2012.

U.S. Navy Has Smallest Number of Ships Since 1916

is tougher. But they know what's going on. They know it better than anybody. They want strong borders. They feel we have to have strong borders. I was up in New Hampshire the other day. The biggest complaint they have -- it's with all of the problems going on in the world, many of the problems caused by Hillary Clinton and by Barack Obama. All of the problems -- the single biggest problem is heroin that pours across our southern border. It's just pouring and destroying their youth. It's poisoning the blood of their youth and plenty of other people. We have to **Fact-check this** ders. We have to keep the drugs out of our country. We are -- right now, we're getting the drugs, they're getting the cash. We need strong borders. We need absolute -- we cannot give amnesty. Now, I want to build the wall. We need the wall.

ClaimBuster + Slack

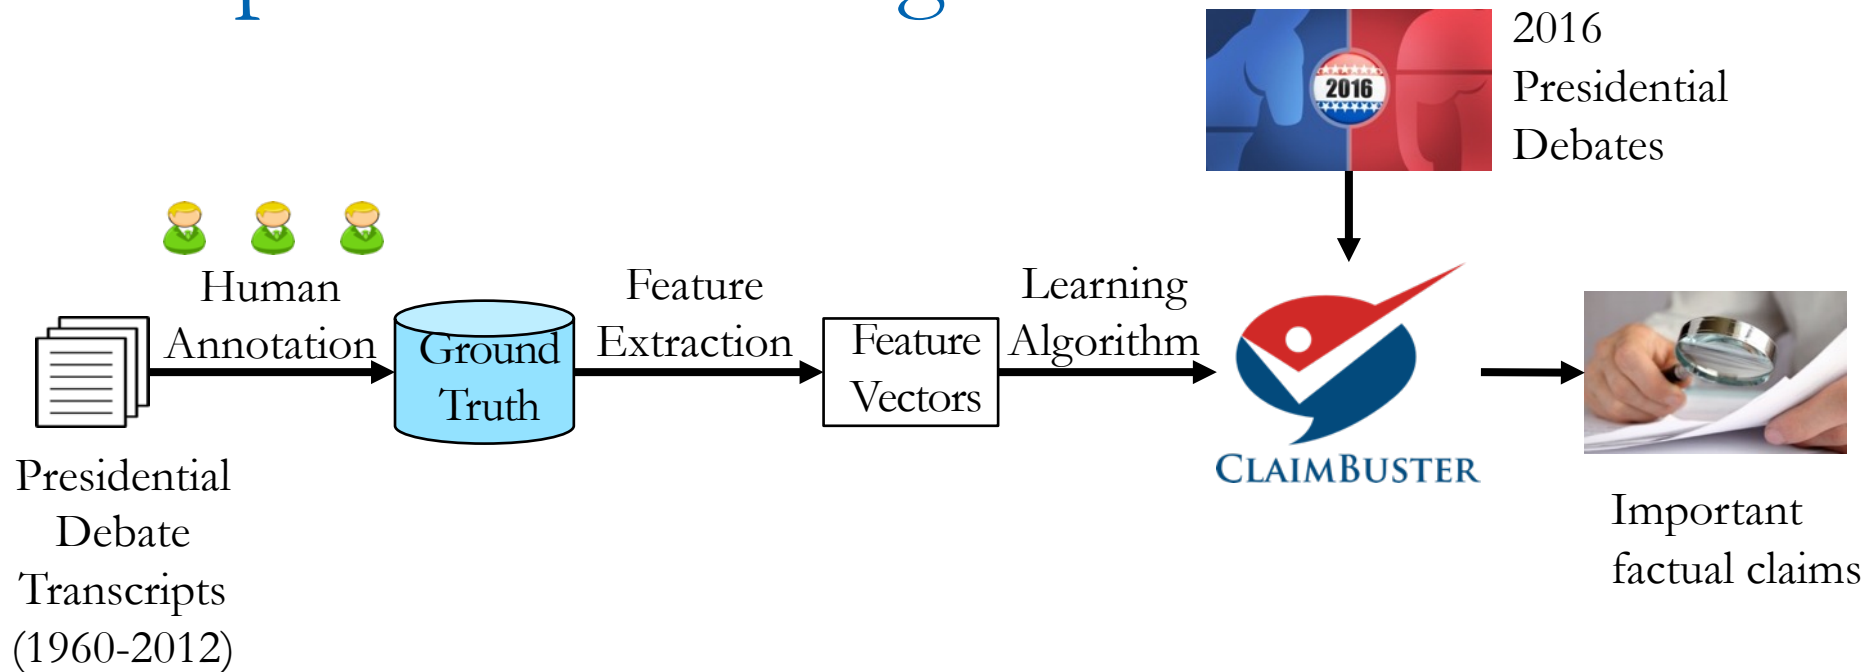

* ClaimBuster provides a platform for you to evaluate pieces of text and identify sentences that are check-worthy. This is our first step in our long-term goal of automating fact-checking. Our Slack app allows you to score individual sentences using the `/getscore claim` command, create a Dropbox folder on our servers using the `/createfolder e-mail` command, store text files from the web into your assigned Dropbox folder for future processing on our servers using the `/processfile e-mail file-url` command, and submit feedback to help us keep improving our services using the `/claimbusterfeedback message` command.

Finding Important Factual Claims: A Supervised Learning Task

Dataset: Presidential Debate Transcripts

- Source: <http://www.debates.org/index.php?page=debate-transcripts>
- All 30 debates (11 general elections) in history: 1960, 1976—2012
- 20k sentences by presidential candidates: removed very short (< 5 words) sentences

Classification and Ranking by Check-worthiness

CFS: Important factual claims

“We spend less on the military today than at any time in our history.” “The President’s position on gay marriage has changed.” “More people are unemployed today than four years ago.”

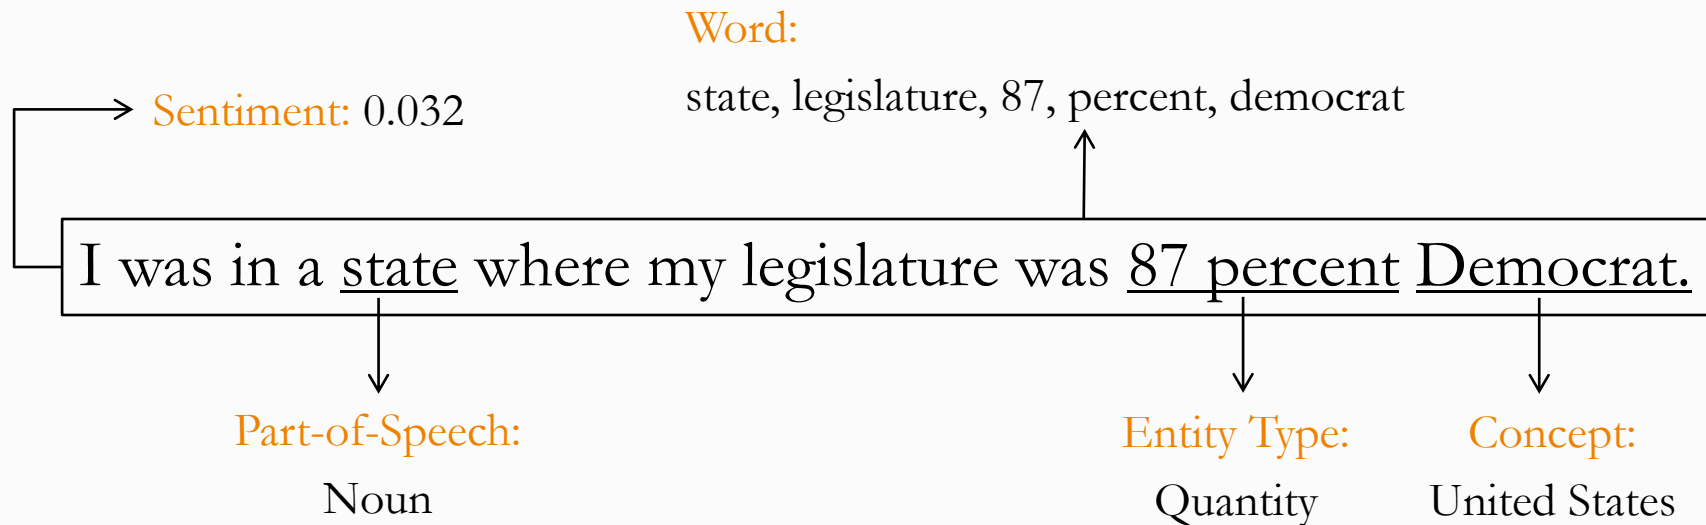

UFS: Unimportant factual claims

“I was in Iowa yesterday.” “My mother enjoys cooking.” “I ran for President once before.”

NFS: No factual claims (opinions, questions & declarations)

“Iran must not get nuclear weapons.” “7% unemployment is too high.” “My opponent is wishy-washy.” “I will be tough on crime.” “Why should we do that?” “Hello, New Hampshire!” “Our plan is to reduce tax rate by 10%.”

Feature Extraction

Sentiment: [-1.0 to 1.0]

Word: tf-idf scores of 6130 words (excluding rare words)

POS Tag: 43 tags

Entity Type: 26 types

Feature Importance

- 6615 features in total
- Used a Random Forest Classifier to calculate the importance of each feature.

Word	percent; people; jobs
POS Tag	noun; cardinal number; past tense; preposition
Entity Type	Quantity; Country; FieldTerminology; Person
Concept	United States Senate; Barack Obama
Sentiment	

Classification Accuracy
