# EE 4342 Microprocessor System Design Project Spring 2004 MW 5:30-6:50pm, 105 GACB (Lecture) M or W 7:00-9:50pm, 148 NH (Lab)

# Instructor:

Jason Losh, Ph.D. <u>jlosh@uta.edu</u> Office Hours are after 7pm MW in 148 NH or in 509 NH by appointment. E-mail is the guickest method of contacting me on non-class days.

# Textbook:

Extensive references, datasheets, application notes, and class notes will be provided on the course web site at <u>http://omega.uta.edu/~jlosh/</u>.

#### **Modified Catalog Course Description:**

Design principles for digital and analog instrumentation utilizing open computer architectures (ISA) and proprietary microcontrollers. The course is intended to provide a comprehensive design experience in microprocessor- and microcontroller-based applications. Will include bus protocol analysis, timing design, simulation, prototype development, and physical debugging of digital circuits. Prerequisite: EE 3310, EE 3317, EE 3340 and senior standing.

#### Comments on the Course:

All topics discussed in class will be accompanied with demonstrations in class using real hardware and software (C and assembly based). While the emphasis of the in class portion is the 8086 microprocessor and PIC 16F877A microcontroller, students are free to use other microprocessors and microcontrollers for project construction.

It is estimated that project costs will range from \$100 to \$250 per team. This cost is mitigated since no textbook is required for the course.

# Prerequisite Background:

Familiarity with the 8086 processor or a very good knowledge of other processors is essential. Essential background also includes assembly language programming, memory organization, mapping, and timing, basic i/o interfacing, and interrupt operation. Also, knowledge of C or C++ is important.

A good understanding of BJT and FET circuits and Fourier series and transforms will also be very useful.

#### **Course Topics:**

- Course introduction and discussion of course objectives
- Presentation of suggested topics
- Microprocessors and microcontrollers supported in lab: Intel, Microchip, and Motorola
- Platform demonstrations (ISA bus PC and 16F877A/16C765 PIC designs)
- Comparison of microprocessor and microcontroller architectures
- Review of 8086 assembly language programming and high-level language function calls
- Introduction to 16F877A assembly language and high-level programming
- Comparison of 8086 microprocessor code and 16F877A microcontroller code
- Review of 8086 maximum-mode architecture, interfacing, timing, and memory
- Memory: organization and interfacing, refresh, ROM (EPROM and flash) and RAM
- Interrupts: software and hardware interrupts, interrupt service routines, and interrupt hooking
- Interrupts v. polling: latency, effective rates, and efficiency
- Project specific i/o issues: digital and analog signal interfacing, isolation, ground loops, noise, and EMI
- Project specific i/o buses and interfaces: PCI, ISA, RS-232/422/423/485, IEEE-1284, and USB

# Additional References:

Many resources will be provided in addition to the textbook. These documents will be posted at <u>http://omega.uta.edu/~jlosh/</u>.

#### **Important Dates:**

First Class (Wednesday, 1/21), Project Plan Due Date (Monday, 2/2), Census Date (Wednesday, 2/4), First UG Drop Date (Friday, 2/27), Test 1 (Wednesday, 3/10), Midsemester (Friday, 3/12), Spring Vacation (Monday-Friday, 3/15-19), Last Drop Date (Friday, 4/16), Test 2 (Wednesday, 4/28), Project Due Date (Wednesday, 5/5)

# Performance Assessment:

- Grade scale: A (90-100), B (75-89), C (60-74), D (50-59), and F (0-49)
- Grade calculation: (Test1 + Test2 + Project × 2) / 4
- The instructor reserves the right to make reasonable changes in performance evaluation as needed.

# Graduate Teaching Assistant:

Mehrotra Sankalp, sankalpm4@hotmail.com

#### **Other GTAs Providing Lab Access:**

Song Younghoon, <u>song uta@hotmail.com</u> (GTA for EE3310) Kim Youngjune, <u>paul72kim@hotmail.com</u> (GTA for EE6314)

#### Lab Hours:

The goal is to have the lab open from Monday-Thursday from 9am to 10pm, Friday from 9am to 9pm, and Saturday from 9am to 3pm. Hours M-F before 6pm will fall under the EE Dept Open Lab Hours Policy. GTA's will cover hours after 6pm and on Saturdays. The lab may not be available at certain periods on these days, such as times around lunch or from 5-6pm.

### Tests (50% of Grade):

- Calculators, rulers, pencils, pens, books, and notes will be allowed during tests.
- Any device capable of compiling or emulating any 80x86 code or 16F877A code can not be used during in-class portions of the tests.
- Take home portions of tests will be due within one week of assignment.
- No makeup will be provided for any test.
- Any request for re-grading must be submitted to the grader within one week of the return date.

# Project (50% of Grade):

- Project teams will consist of one to three team members.
- The initial project plan is due on Monday, 2/2.
- Interim deadlines will vary upon the project chosen.
- The final project will be presented in class on Wednesday, 5/5.

# Academic Honesty:

It is the philosophy of The University of Texas at Arlington that academic dishonesty is a completely unacceptable mode of conduct and will not be tolerated in any form. All persons involved in academic dishonesty will be disciplined in accordance with University regulations and procedures. Discipline may include suspension or expulsion from the University. "Scholastic dishonesty includes but is not limited to cheating, plagiarism, collusion, the submission for credit of any work or materials that are attributable in whole or in part to another person, taking an examination for another person, any act designed to give unfair advantage to a student or the attempt to commit such acts." (Regents' Rules and Regulations, Part One, Chapter VI, Section 3, Subsection 3.2, Subdivision 3.22). ANY CHEATING WILL RESULT IN SEVERE PENALTIES. All work submitted must be original. If derived from another source, a full bibliographical citation must be given.

To be eligible to participate in two or three member project teams, you will be requested to sign and return a letter acknowledging the College of Engineering Ethics policy.

#### Americans with Disabilities Act:

If you require an accommodation based on disability, please feel free to meet with me during the first week of the semester to make sure that you are properly accommodated. Contact Dr. Cheryl Cardell (272-3670) or Mr. Jim Hayes (272-3364) for more information.
