

# CSE-4303 & CSE-5365 Computer Graphics. Fall 2025

## Instructor Information

**Name:** Farhad Kamangar

**Office Location:** 524 ERB

**Office Phone:** 817-272-3605

**Email:** kamangar@cse.uta.edu

**Faculty Profile:** <https://mentis.uta.edu/explore/profile/farhad-kamangar>

**Office Hours:** Tuesdays & Thursdays 5:00-6:30 PM

**Communication Guidelines:** Preferred communication method is email.

## Course Information

Section Information: CSE-4303-001 /CSE-5365-001

**Course Description:** Theory and practice for the visual representation of data by computers including display devices, output primitives, planes and curved surfaces, two- and three-dimensional transformations, parallel and perspective viewing, removal of hidden lines and surfaces, illumination models, ray tracing, radiosity, color models, and computer animation.

**Prerequisites:** Admitted into an Engineering Professional Program. C or better in each of the following: [CSE 3318](#), and either [CSE 3380](#) or [MATH 3330](#)..

## Course Delivery Method

This course is designated ON-CAMPUS, which means Majority On Campus. The majority of course instruction, exams and projects delivered on-campus or at designated instructional sites, in-person.

For a full definition of the course modalities, please visit the [Course Modalities page](#).

## Time and Place of Class Meetings

TBD

### Time Zone

This course operates on Central Time. All times listed for class meeting times, exams, and assignment deadlines are in Central Time (CT).

## Classroom/Lecture Recording Policy

Faculty maintain the academic right to determine whether students are permitted to record classroom and online lectures. Recordings of classroom lectures, if permitted by the instructor or pursuant to an ADA accommodation, may only be used for academic purposes related to the specific course. They may not be used for commercial purposes or shared with non-course participants except in connection with a legal proceeding.

# CSE-4303 & CSE-5365 Computer Graphics. Fall 2025

Recording of classroom and online lectures in this course is allowed.

## Expectations for Out-of-Class Study

Beyond the time required to attend each class meeting, students enrolled in this course should expect to spend at least an additional 12 hours per week of their own time in course-related activities, including reading required materials, completing assignments, preparing for exams, etc. Be advised that this course is intended for graduate students in computer science and engineering. It is assumed that all students are comfortable with math (calculus, linear algebra, vectors, and matrices) and are proficient in high level programming languages, particularly Python.

## Student Learning Outcomes

This course focuses both on the theoretical and practical implementation of the most common algorithms and techniques in computer graphics. After completing this course, students will be able to:

- Represent and construct mathematical models of 3D scenes containing planar and curved objects and surfaces.
- Understand the mathematics and representation of various transformations.
- Understand and use matrices to transform and position 3D objects in space.
- Use OpenGL to create high quality computer graphics.
- Understand shading models.
- Understand and implement ray tracing algorithms..

## Textbook Information

### Required Textbooks and Materials

All the required reading materials will be provided online.

### Recommended Course Materials

- Introduction to Computer Graphics by Foley, VanDam, Feiner, Hughes, Phillips, Addison-Wesley
- Practical Linear Algebra - A Geometry Toolbox by Gerald Farin and Dianne Hansford, A K Peters
- David J. Eck – *Introduction to Computer Graphics* ([Free PDF](#))

## Course Schedule and Important Dates

- First day of classes: Aug. 18, 2025
- Census day: Sept. 3, 2025
- Exam 1: Oct. 10, 2025.
- Last day to drop classes: Oct. 31, 2025
- Thanksgiving Holidays: Nov. 26-28, 2025
- Last day of classes: Dec. 2, 2025

# CSE-4303 & CSE-5365 Computer Graphics. Fall 2025

- Exam 2: Dec, 5, 2025 2:00-4:30 PM.

## Grading Information

Grades will be calculated based on the following tables:

Percentages	
Assignments	25%
Quizzes	25%
Exam 1	25%
Exam 2	25%

Letter Grades Thresholds	
87%–100%	A
75%–87%	B
65%–75%	C
55%–65%	D
0%–55%	F

- Grading Policy: Grades will not be curved and will be strictly determined based on the criteria outlined in the table above. Research shows that curve grading can demotivate students from studying effectively. Additionally, since curves are typically applied at the end of a semester, they create uncertainty, leading to increased stress and leaving students unsure of their standing in the course or what is required to achieve a specific grade.
- Tracking Performance: All grades and assignments will be posted on Canvas. Students are expected to monitor their progress throughout the semester and seek guidance from the instructor if their performance falls below satisfactory levels.
- Important: Grades will be determined solely by the grading criteria listed above. Students should not request or expect any additional factors to be considered when calculating the course grade. For example, factors such as needing a higher grade to improve GPA, remain in a program, qualify for a job offer, or graduate will not be considered.

## Assignments & Exams

This course includes face-to-face lectures, programming assignments, in-class quizzes and two exams.

- The lowest quiz score will be dropped.
- Quizzes and exams will include both theoretical and programming questions.
- Quizzes and exams will be comprehensive, covering material from pre-readings, textbook chapters, and class lectures.
- Quizzes may be administered at any time during a class period and will only be given to students who are present at the time of the quiz.
- Only non-programmable calculators are allowed during quizzes and exams, unless explicitly specified otherwise. The use of all other electronic devices, including laptops, cellphones, smartwatches, and tablets, is prohibited.
- There will be no make-up quizzes or exams. Exceptions will only be made if you have an approved written medical or university excuse for missing a quiz or exam. In such cases, the average of your other quizzes or exams will replace the grade of the missed quiz or exam. No EXCEPTIONS.

# CSE-4303 & CSE-5365 Computer Graphics. Fall 2025

## Incomplete Grades and Make-Up Exams

Incompletes will not be granted for this course, and there will be no make-up quizzes or exams. The only exceptions apply to absences supported by official written documentation from a medical provider or the university. In such cases, the missed quiz or exam grade will be replaced by the average of the student's remaining quizzes or exams. No other exceptions will be considered.

## Assignments

- All assignments will be given well in advance of the due date and are due by 11:59 PM on the specified date.
- A 24-hour grace period is available after the due date with no penalty. The grace period is intended to accommodate unforeseen events such as network or server issues. No late assignments will be accepted after the grace period and the grade for the missed assignment will be zero.
- Assignments must be submitted electronically via Canvas.
- The programming language for this class is Python, and all lecture examples and demos will also use Python.
- Each assignment must be self-contained (unless explicitly stated otherwise), including all required components. The teaching assistant will only grade the files submitted—no additional or supplemental files will be used.
- Programs that do not run will receive no credit (no partial credit for non-running programs). Programs that partially meet requirements may receive partial credit but must still run without errors.
- It is each student's responsibility to thoroughly test their program before submission to ensure it runs without errors. After submitting an assignment, it's advisable to download and test the submitted file to confirm the correct version was submitted.
- All assignments are graded as submitted. Once the submission deadline has passed, no changes or modifications can be made to the submitted files.
- Assignments may be submitted multiple times before the deadline.

## General Policies

- Your opinion matters. All constructive suggestions will be carefully considered. I am open to considering any idea that contributes to enhancing the overall learning objectives of this course. Your suggestion should be applicable to all students in the class and focus on improving the learning experience of all students, rather than addressing individual preferences or circumstances. In order to maintain fairness and consistency, any appeal based on individual preferences or personal reasons will regrettably be disregarded. My aim is to create an inclusive and unbiased learning environment for all students. Please DO NOT ask for any exception.
- Be there. Multiple research studies indicate that the use of electronic devices in class can lead to a distracting learning environment. You learn better when you are mentally present. Cell phones, laptops, I-Pads, Kindles, and other electronic devices must be turned off during class (unless explicitly specified otherwise for particular in-class exercises).
- DO NOT enter the classroom if you are late. Your late arrival will disturb the continuity of the subject and may break other student's concentration.
- Responsibility for Missed Material: You are responsible for all material presented during classes from which you were absent.

# CSE-4303 & CSE-5365 Computer Graphics. Fall 2025

- **Communication:** All announcements will be communicated via email. You are responsible for checking your email.

## Email Guidelines

- **Subject Line:** Begin the subject line of your email with "CSE-4303" or "CSE-5365". Follow this prefix with a concise description of the topic you're addressing. For example, "CSE-4303: Question about an old test."
- **Opening Line:** In the first line of your email, clearly state the main point or purpose of your message. This helps the recipient quickly understand the nature of your inquiry or request. For example, "I have a question about old test number 2 in Fall 2023". Follow this initial statement with any necessary details or justification in the subsequent paragraphs to provide context and support for your question or request.
- **Email Address:** Always use your official university email address.
- **Signature:** Conclude your email with your full name formatted as (Last, First). This practice helps to clearly identify who is sending the message and ensures proper attribution. For example, "Smith, John."

## Grade Grievance & Re-Grading Policy

I am committed to ensuring that all grading is fair, consistent, and transparent. If you believe that a grading error has occurred, Submit your request for regrading **in writing via email** within **72 Hours** of the grade being posted.

Your email must:

- Begin the subject line with: CSE-4303 / CSE-5365: Re-Grading Request.
- Specify exactly which question(s) or section(s) you believe were graded incorrectly.
- Provide a clear, concise explanation supported by evidence from course materials or instructions.
- Be sent from your official university email account.
- Conclude with your full name in the format: (Last, First).
- The entire submission may be regraded, which can result in an **increase, decrease, or no change** to your score.
- Grades will be determined **only** by the published grading criteria. Requests based on personal circumstances—such as the need to improve GPA, remain in the program, secure a job offer, or graduate—will not be considered.
- Requests without a clear academic justification, or those seeking exceptions, may result in a **reduction** of the original grade.

## Attendance Policy

Attending class sessions is a critical predictor and indicator of student success. The University of Texas at Arlington does not recognize a single attendance policy but encourages faculty to establish class-specific policies on attendance. As the instructor of this section, At The University of Texas at Arlington, taking attendance is not required but attendance is a critical indicator in student success. Each faculty member is free to develop his or her own methods of evaluating

# CSE-4303 & CSE-5365 Computer Graphics. Fall 2025

students' academic performance, which includes establishing course-specific policies on attendance. As the instructor of this section, **I will NOT** take attendance. However, while UT Arlington does not require instructors to take attendance in their courses, the U.S. Department of Education requires that UT Arlington have a mechanism in place to verify Federal Student Aid recipients' attendance in courses. UT Arlington instructors are expected to report the last date of attendance when submitting students' final course grades; specifically, when a student earns a course grade of F, instructors must report the last date a student attended their class. For on-campus classes, last date of attendance can be based on attendance rosters or on academic engagements—a test, participation in a class project or presentation, or Canvas-based activity. Online or distance education courses require regular and substantive online interaction and participation. Students must participate in online course activities in Canvas to demonstrate attendance; logging into an online class is not sufficient by itself to demonstrate attendance. The last date of attendance is reported to the U.S. Department of Education for federal financial aid recipients.

## Generative AI Use in This Course

The use of Generative AI (GenAI) in course assignments and assessments must align with the guidelines established by the instructor. Unauthorized use of GenAI could result in breaches of academic integrity. Instructors are responsible for clearly delineating the permissible uses of GenAI in their courses, underscoring the importance of responsible and ethical application of these tools.

[Community Standards](#) within the [Office of the Dean of Students](#) articulate the university's stance on [academic integrity and scholastic dishonesty](#). These standards extend to the use of GenAI. Unauthorized or unapproved use of GenAI in academic work falls within the scope of these policies and will be subject to the same disciplinary procedures.

As the instructor for this course, I have adopted the following policy:

Generative AI tools (e.g., ChatGPT, Copilot) may be used **in a limited way**:

### 1. Understanding Requirement

- You must fully understand any AI-assisted code or content you submit.
- You may be **quizzed individually** on your work at any time. If you cannot explain how your code works or why you wrote it that way, it will be considered a violation of course policy.

### 2. Originality Requirement

- AI output must be **substantially modified** and adapted to your own style and problem-solving approach.
- If your code appears **substantially similar** to another student's submission due to AI use, it will be treated as **collusion or plagiarism** under University academic integrity rules.

### 3. Attribution Requirement

- When AI tools are used, you must **disclose**:
  - The tool's name (e.g., ChatGPT, GitHub Copilot)
  - The prompt(s) you used or a summary of the assistance received
- Failure to disclose AI use will be treated as an integrity violation.

### 4. Responsibility for Accuracy

# CSE-4303 & CSE-5365 Computer Graphics. Fall 2025

- AI tools can produce incorrect or inefficient solutions. You are solely responsible for testing, debugging, and verifying your submission.

**Summary:** You may use AI for inspiration, guidance, and partial code generation—but you must (1) understand your work, (2) make it your own, and (3) follow all disclosure and originality rules. Violations will be reported as academic misconduct.

## Institutional Policies

UTA students should review the [University Catalog](#) and the [Syllabus Institutional Policies](#) page for institutional policies and contact the specific office with any questions. The institutional information includes the following policies, among others:

- Drop Policy
- Disability Accommodations
- Academic Integrity
- Electronic Communication

## UTA Honor Code

UTA students are expected to adhere to and observe standards of conduct compatible with the University's functions as an educational institution and live by the [University of Texas at Arlington's Honor Code](#). It is the policy of The University of Texas at Arlington to uphold and support standards of personal honesty and integrity for all students consistent with the goals of a community of scholars and students seeking knowledge and responsibility.

All students enrolled in this course are expected to adhere to the the [University of Texas at Arlington's Honor Code](#):

UT Arlington faculty members may employ the Honor Code in their courses by having students acknowledge the honor code as part of an examination or requiring students to incorporate the honor code into any work submitted. Per UT System *Regents' Rule* 50101, §2.2, suspected violations of university's standards for academic integrity (including the Honor Code) will be referred to the Office of Student Conduct. Violators will be disciplined in accordance with University policy, which may result in the student's suspension or expulsion from the University. Additional information is available at <https://www.uta.edu/conduct/>.

All students are expected to pursue their academic careers with honesty and integrity. "Scholastic dishonesty includes, but is not limited to, cheating, plagiarism, collusion, the submission for credit of any work or materials that are attributable in whole or in part to another person, taking an examination for another person, any act designed to give unfair advantage to a student or the attempt to commit such acts" (Regents' Rules and Regulations, Part One, Chapter VI, Section 3, Subsection 3.2, Subdivision 3.22.). Students found guilty of dishonesty in their academic pursuits are subject to penalties that may include suspension from the university.

**Any suspicious activity of academic dishonesty will be reported to the Office of Student Conduct.**

# CSE-4303 & CSE-5365 Computer Graphics. Fall 2025

**For any student found guilty of academic dishonesty the instructor reserves the right to impose any grading penalties, including failing the course regardless of any other aspects of student performance, in addition to any other penalties assessed by the Office of Student Conduct (suspension, expulsion, probation).**

These and other applying UTA rules, will be strictly enforced. Any case of academic dishonesty will be treated in accordance with the UTA Handbook of Operating Procedures or the Judicial Affairs. If you do not understand this policy, it is your responsibility to obtain clarification or any additional information you may require. Students are not allowed to:

- Collaborate with others on the code they write or on assignment solutions.
- Copy any part of someone else's program, even with permission or modifications.
- Share or give their code, or any subset of it, to another student.
- Review another student's solution, including solutions from past semesters.
- Hire an individual or company to complete assignments or exams.
- Use generative AI tools beyond the adopted policy.

## Student Conduct

Students are expected to maintain professionalism and civility in their language and behavior:

- During lectures.
- During office hours.
- In any oral, written, or electronic communication with the instructor and TAs.
- In assignment submissions.

For any student violating this policy, the instructor reserves the right to impose appropriate grading penalties, including a failing grade for the course, regardless of other aspects of student performance. Violations include using vulgar, insulting, disrespectful, or threatening language, making noise or talking during lectures, disrupting lectures, or otherwise making it difficult for other students to follow the lecture.

## Academic Success Center

The Academic Success Center (ASC) offers a range of resources and services designed to help you maximize your learning and achieve academic success as a student at the University of Texas at Arlington. ASC services include supplemental instruction, peer-led team learning, tutoring, mentoring, and TRIO SSS. Academic Success Center services are provided at no additional cost to UTA students. For additional information, visit the [ASC](#) website or submit a [tutoring request form](#).

## The English Writing Center (411LIBR)

The Writing Center offers FREE tutoring in 15-, 30-, 45-, and 60-minute face-to-face and online sessions to all UTA students on any phase of their UTA coursework. Register and make appointments online at the [Writing Center](#). Classroom visits, workshops, and specialized services for graduate students and faculty are also available. Please see [Writing Center: OWL](#) for detailed information on all our programs and services.

# CSE-4303 & CSE-5365 Computer Graphics. Fall 2025

## Academic Plaza

The Library's 2<sup>nd</sup> floor [Academic Plaza](#) offers students a central hub of support services, including IDEAS Center, University Advising Services, Transfer UTA, and various college/school advising hours. Services are available during the [library's hours](#) of operation.

## UTA Health and Wellbeing Resources

UT Arlington is committed to the safety, success, and well-being of our students. To support our community, UTA has established a Community Advocacy, Response, and Engagement (CARE) Team, a dedicated group of campus professionals responsible for helping students who could benefit from academic, emotional, or psychological support, as well as those presenting risks to the health or safety of the community. If you know of someone experiencing challenges, appearing distressed, needing resources, or causing a significant disruption to the UTA community, please submit a [CARE Referral](#) by visiting the [CARE Team](#) page. You may also submit a referral for yourself if you would like additional support.

UTA students also have access to virtual, on-demand emotional support, appointment-based counseling, advanced psychiatric care, and more. For more information, visit [TimelyCare](#).

NOTE: If a person's behavior poses an immediate threat to you or someone else, contact UTA Police at 817-272-3003 or dial 911. If you or someone you know needs to speak with a crisis counselor, please reach out to the [MAVS TALK 24-hour Crisis Line](#) at 817-272-8255 or the [National Suicide and Crisis Lifeline](#) at 988.

## Student Services Page

The [Student Services page](#) provides links to many resources available to UTA students, including:

- Academic Success
- Counseling and Psychological Services (CAPS)
- Health Services
- Students with Disabilities
- Veteran Services

Students are also encouraged to check out [Career Center](#) resources to enhance their career-readiness, find student employment, search for internships, and more. We encourage [Major Exploration](#) and the use of [Experiential Major Maps](#) to keep students on track for graduation. Refer to the [Graduation Help Desk](#) for more details.

## Accessibility of Course Materials

If you experience any accessibility barriers with course materials, please know that accommodations are available. You can get assistance through the [Student Access and Resource \(SAR\)](#) Center or by contacting your instructor directly. Please don't hesitate to reach out if you need help.

# CSE-4303 & CSE-5365 Computer Graphics. Fall 2025

## Online Academic Success Guide

Visit the [Online Academic Success Guide](#) to explore a list of helpful tips and resources to help you succeed in your online journey.

## MavAlert System

The MavAlert system sends information to cell phones or email accounts of subscribed users in case of an emergency. Anyone can subscribe to MavAlerts at [Emergency Communication System](#).

## Emergency Phone Numbers

In case of an on-campus emergency, call the UT Arlington Police Department at **817-272-3003** (non-campus phone) or **2-3003** (campus phone). You may also dial 911. The non-emergency number is 817-272-3381.

# CSE-4303 & CSE-5365 Computer Graphics. Fall 2025

<b>Introduction</b>	Week 1
<b>Two-dimensional concepts.</b> <ul style="list-style-type: none"><li>• Translation, rotation, and scaling.</li><li>• Homogeneous coordinate systems.</li><li>• Plane equations.</li><li>• Parametric equations.</li><li>• Matrix representations.</li><li>• Window to viewport mapping</li></ul>	
<b>Mathematics for 3D computer graphics</b> <ul style="list-style-type: none"><li>• Parametric equations</li><li>• Plane equations</li></ul> <b>Three-dimensional transformations.</b> <ul style="list-style-type: none"><li>• Translation.</li><li>• Rotation.</li><li>• Scaling.</li><li>• Shear.</li><li>• Composite transformations.</li></ul>	Week 2-3
<b>Viewing in 3-dimensions.</b> <ul style="list-style-type: none"><li>• Orthographic parallel projections.</li><li>• Oblique parallel projections..</li><li>• Perspective projections.</li><li>• Mathematics of 3-dimensional projections.</li></ul>	
<b>Three-dimensional representation of curved surfaces</b> <ul style="list-style-type: none"><li>• Polygon meshes.</li><li>• Bezier curves and surfaces.</li><li>• Hermite curves.</li><li>• Spline curves and surfaces.</li></ul>	Week 4 - 5
	Week 6-8

## CSE-4303 & CSE-5365 Computer Graphics. Fall 2025

<b>Color</b>	Week 9
<ul style="list-style-type: none"><li>• Color Spectrum</li><li>• CIE Chromaticity</li><li>• Color space (RGB, HSV, YIQ, YCbCr, ..)</li><li>• Color conversion</li></ul>	
<b>OpenGL</b>	Week 10-12
<ul style="list-style-type: none"><li>• Facts and Concepts</li><li>• Naming Convention</li><li>• Installation</li><li>• Primitives</li><li>• Transformations</li><li>• Lighting and Shading</li><li>• Texture</li><li>• Display Lists</li><li>• Packages</li><li>• Vertex Shader</li><li>• Fragment Shader</li></ul>	
<b>Illumination and Shading</b>	Week 13 - 15
<ul style="list-style-type: none"><li>• Illumination models.</li><li>• Shading models for polygons.</li><li>• Shadows.</li><li>• Reflections.</li><li>• Ray tracing.</li></ul>	

*As the instructor for this course, I reserve the right to adjust this schedule in any way that serves the educational needs of the students enrolled in this course.*

–Farhad Kamangar
